

Year 10	Lesson Name	Substantive Knowledge	Disciplinary Knowledge	Tier 3 Vocabulary
<b>Algorithms</b>				
<b>Half Term 1</b>	<b>Computational Thinking</b>	Understand the principles of Computational Thinking, specifically, abstraction, decomposition, algorithmic thinking	Students will be able to produce structure diagrams to show, the structure of a problem and the subsections and their links to other subsections.	Computational thinking, abstraction, decomposition, algorithmic thinking, inputs, processes, outputs, structure diagrams, pseudocode, flowcharts, reference language, trace tables, syntax error, logical error, algorithm, decision, terminal, sub program, process, binary search, linear search, bubble sort, merge sort, insertion sort, variables, constants, operators, assignments, sequence, selection, iteration, Boolean operators, arithmetic operators, modulus, quotient, exponentiation
	<b>Searching Algorithms</b>	Students will understand different types of searching algorithms and their purpose: Binary Search, Linear Search	Students will be able to perform a Binary Search and a Linear Search.	
	<b>Sorting Algorithms</b>	Students will understand different types of sorting algorithms and their purpose: Bubble sort Insertion Merge  Identify positive and negative interactions online	Students will be able to perform a Bubble sort, and an Insertion Merge	
	<b>Developing algorithms using flowcharts</b>	Understand the different flow chart symbols	Create, interpret, correct, complete and refine algorithms using flowcharts	

		Understand arithmetic operators and variables		
	<b>Developing algorithms using pseudocode</b>	Define the data types integer, real, Boolean, character, string  Understand the different Boolean operators	Write algorithms in pseudocode involving sequence, selection and iteration  Be able to use Boolean operators	
	<b>Interpret correct complete algorithms</b>	Understanding the purpose of an algorithm  Understand how to determine the output of an algorithm  Understand different errors in an algorithm	Determine the output of an algorithm  Correct errors in an algorithm  Create and complete a trace table	
<b>Lesson 10 Unit Assessment</b>				
	<b>Reteach</b>	TBC		
<b>Systems Architecture</b>				
	<b>Architecture of the CPU</b>	Understand the purpose of the CPU	Explain the purpose and how the fetch-execute cycle works  Explain the purpose of the following registers: MAR MDR PC ACC	Fetch-execute, CPU, ALU (Arithmetic Logic Unit), CU (control unit), cache, registers, Von Neumann architecture, MAR (Memory Address Register), MDR (Memory Data Register), Program Counter, Accumulator, clock speed, cache size, cores, embedded

			<p>Explain what the following components do:</p> <p>ALU CU Cache</p>	<p>systems, memory address, Primary storage, RAM, ROM, virtual memory, volatile, non-volatile, secondary storage, optical, magnetic, solid state, drive, disk, hard disk, floppy disk, tape drive, Blu-ray, DVD, CD, capacity, speed, portability, durability, reliability, cost, storage device, storage media</p>
	<p><b>14 Programming Lesson</b></p>	<p>To develop python skills</p>	<p>Learn how to write structured programs</p>	<p>Python Objective 00 &amp; 01 – TIME (Try, Investigate, Make, Evaluate), Students work at own pace through the different workbooks with guidance from the teacher, who tracks each students progress via an excel sheet. Support is given on an individual basis.</p>
	<p><b>CPU Performance</b></p>	<p>Understand the function of cache within the CPU</p> <p>Name the following characteristics that affect performance: Clock Speed Cache size Number of cores</p>	<p>Explain how the characteristics affect performance</p> <p>Explain the purpose of embedded systems</p>	
	<p><b>Programming Lesson</b></p>	<p>To develop python skills</p>	<p>Learn how to write structured programs</p>	<p>Python Objective 00 &amp; 01 – TIME (Try, Investigate, Make, Evaluate), Students work at own pace through the different workbooks with</p>

				guidance from the teacher, who tracks each students progress via an excel sheet. Support is given on an individual basis.
<b>Half term 2</b>	<b>Memory</b>	Understand the difference between RAM & ROM  Understand virtual memory	Describe the difference between RAM & ROM  Explain the need for virtual memory	
	<b>Secondary Storage</b>	Name the different secondary storage devices: optical, magnetic, solid state  Name the characteristics of each storage device: Capacity, speed, portability, durability, reliability, cost	Explain why secondary storage is required  Evaluate the different storage	
	<b>4 + 5 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	Python Objective 00 & 01 – TIME (Try, Investigate, Make, Evaluate), Students work at own pace through the different workbooks with guidance from the teacher, who tracks each students progress via an excel sheet. Support is given on an individual basis.

	<b>6 Revision Lesson</b>	TBC – Based on formative assessments in lessons, homework, quizizz and smart revise as to what the students require		
<b>7 Unit Assessment</b>				
	<b>8 Reteach</b>	TBC		
	<b>9 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	Python Objective 00 & 01 – TIME (Try, Investigate, Make, Evaluate), Students work at own pace through the different workbooks with guidance from the teacher, who tracks each students progress via an excel sheet. Support is given on an individual basis.
<b>Programming Fundamentals</b>				
	<b>10 + 11 + 12 Programming Fundamentals</b>	Understand and describe different data types: Integer, real/float, Boolean character, string	Understand and describe different data types: Integer, real/float, Boolean character, string  Understand the difference between constants and variables  Understand how to assign variables and constants	Variables, constants, operators, inputs, outputs, assignment, sequence, selection, iteration, arithmetic operators, Boolean operators, AND, OR, NOT, ==, !=, <, <=, >, >=, +, -, *, /, MOD, DIV, ^, exponentiation, data types, integer,

		<p>Understand the difference between constants and variables</p> <p>Understand how to assign variables and constants</p> <p>Understand the difference between MOD and DIV</p>	<p>Understand the difference between MOD and DIV</p>	<p>real, Boolean, character, string, casting, string manipulation, file handling, open, read, write, close, records, SQL, arrays, one-dimensional array, two-dimensional array, sub program/subroutine, functions, procedures, random numbers, concatenation, slicing, SQL, SELECT, FROM, WHERE.</p>
	<p><b>13 + 14 Sequence &amp; Selection</b></p>	<p>Understand what selection is</p> <p>Understand what nested selection is</p> <p>Understand the terms required to create Boolean expressions</p> <p>Understanding the need for random number generator</p>	<p>Use selection</p> <p>Use nested selection</p> <p>Use Boolean expressions</p> <p>Use random number generator</p>	
<p>Half Term 3 (21)</p>	<p><b>1 + 2 Iteration</b></p>	<p>Understand iteration in an algorithm</p>	<p>Use iteration in an algorithm</p>	
	<p><b>3 + 4 Array</b></p>	<p>Understand what a 2d and 3d array are</p> <p>Understand that Spreadsheets have</p>	<p>Be able to use and explain what a 2d and 3d are used for</p>	

		formulas and how to write them		
	<b>5 + 6 Procedures &amp; Functions</b>	<p>Understand the concepts of subroutines</p> <p>Understand parameters to pass data to procedures and functions</p> <p>Understand that subroutines can use local variables</p>	<p>Write simple subroutines (procedures and functions)</p> <p>Use parameters to pass data to procedures and functions</p> <p>Explain why local variables are good practise</p> <p>Use local variables</p> <p>Explain the advantages of functions and procedures</p>	
	<b>7 + 8 Records &amp; files</b>	Understand basic file handling operations: Open, read, write, close	Use basic file handling operations: Open, read, write, close	
	<b>9 Introduction to SQL</b>	<p>Understand the need for SQL and how it works</p> <p>Understand the key criteria and words AND, OR, LIKE, SELECT, FROM WHERE, ORDER BY, *(WILDCARD)</p>	Use SQL including all the criteria and key words	
	<b>10 Revision Lesson</b>	TBC – Based on formative assessments in lessons, homework, quizz and smart		

		revise as to what the students require		
<b>11 Assessment</b>				
	<b>12 Reteach</b>	TBC		
<b>Logic &amp; Language</b>				
	<b>13 + 14 Logic Diagrams &amp; Truth Tables</b>	<p>Understand the purpose of a truth table</p> <p>Understand Logic Gates: AND, OR, NOT</p>	<p>Construct truth tables</p> <p>Interpret the results of truth tables</p> <p>Create, modify and interpret logic circuit diagrams</p>	<p>Defensive design, anticipating misuse, authentication, validation, maintainability, sub programs, naming conventions, indentation, commenting, testing, iterative testing, final/terminal testing, syntax, syntax error, logic error, test data, normal, boundary, invalid, erroneous, test plan, AND, OR, NOT, truth table, logical operators, logic gates, logic diagrams, conjunction, disjunction, negation, high-level language, low-level language, translators, compiler, interpreter, compiler, interpreter, Integrated Development Environment (IDE), editors, error diagnostics, run-time environment.</p>
	<b>15 +16 Defensive Design</b>	<p>Understand how to make maintainable programs including: The use of sub programs, Naming conventions, Indentation, Commenting</p> <p>Describe defensive design considerations: Input validation Anticipating misuse Authentication</p>	<p>Write programs that use: sub programs, Naming conventions, Indentation, Commenting</p>	
	<b>17 + 18 Errors &amp; Testing</b>	<p>Understand the purpose of iterative and final testing</p>	<p>Correct syntax and logic errors</p> <p>Use correct testing data for Normal, Boundary, Invalid, Erroneous</p>	

		<p>Understand the difference between syntax and logic errors</p> <p>Understand different types of test data including: Normal, Boundary, Invalid, Erroneous</p>		
Half Term 4	<b>1 Revision Lesson</b>	TBC – Based on formative assessments in lessons, homework, quiz and smart revise as to what the students require		
	<b>2 Unit Assessment</b>			
	<b>3 Reteach</b>	TBC		
	<b>Data Representation</b>			
	<b>4 Units &amp; Binary Numbers</b>	<p>Define the terms bit, nibble, byte, kilobyte, megabyte, gigabyte, terabyte and petabyte</p> <p>Understand that data needs to be converted into binary so it can be</p>	Convert positive denary whole numbers (0-255) into 8-bit binary numbers and vice versa	Bit, nibble, byte, kilo, mega, giga, tera, peta, binary, bit depth, sample rate, colour depth, pixel, bit per character, binary shift, shift left, shift right, most significant bit, least significant bit, character set, ASCII, Unicode, metadata, hertz, compression, lossy, lossless

		processed by a computer	
	<b>5 Binary arithmetic and hexadecimal</b>	<p>Understand the need to convert whole numbers to hexadecimal and vice versa</p> <p>Understand the need to convert binary to denary and to hexadecimal</p> <p>Understand and explain how overflow errors occur</p>	<p>Convert whole numbers to hexadecimal and vice versa</p> <p>Convert binary to denary and to hexadecimal</p> <p>Add binary numbers</p>
	<b>6 Programming Lesson</b>	To develop python skills	Learn how to write structured programs
	<b>7 + 8 Characters</b>	<p>Understand the use of binary codes to represent characters</p> <p>Understand the term 'character set'</p> <p>Understand why characters sets are required and how</p>	<p>Explain the need for character sets</p> <p>Explain the relationship between the number of bits per character in a character set, and the number of characters that can be represented using: ASCII, Extended ASCII, Unicode</p>
	<b>9 + 10 Images</b>	Understand how bitmap graphics are made up of pixels	<p>Explain how each pixel is represented in binary</p> <p>Explain the need for image metadata</p>

		Understand the term pixels  Understand that the number of bits per pixel determines the number of available colours for an image	Explain the relationship between file size and image resolution	
	<b>11 + 12 Sound</b>	Understand how sound is sampled and stored in digital form  Understand the terms Sampling, resolution sample rate, and bit depth	Explain how sampling intervals and resolution affect the size of a sound file using the terms: Sample rate Bit depth  Explain the trade-off between file size and the quality of playback  Be able to represent a short sound file in binary	
	<b>13 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	
	<b>14 + 15 Compression</b>	Understand the terms: compression, lossy, lossless	Explain the need for compression  Describe the difference between lossy and lossless compression	
Half Term 5 (18)	<b>1 Revision Lesson</b>	TBC – Based on formative assessments in lessons, homework, quizz and smart revise as to what the students require		
	<b>2 Unit Assessment</b>			
	<b>3</b>	Re-Teach TBC		

<b>4 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	
<b>5 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	
<b>6 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	
<b>7 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	
<b>8 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	
<b>9 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	
<b>10 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	
<b>11 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	
<b>12 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	
<b>13 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	
<b>14 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	
<b>15 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	
<b>16 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	

	<b>17</b>	Revision lesson for end of year assessment - TBC		
	<b>18</b>	Revision lesson for end of year assessment - TBC		
	<b>Impacts of Digital Technology</b>			
<b>Half Term 6</b>	<b>1 + 2 + 3 Ethical and cultural issues</b>	Understand the terms: Ethical Cultural	Discuss the impacts of digital technology on the wider society with specific reference to Ethical and cultural issues	Ethical, cultural, environmental, legislation, manufacture, disposal, upgrade, replace, e-waste, privacy, legal, data protection, computer misuse, copyright, copyright designs and patents act, open source, proprietary, software licence
	<b>4 + 5 + 6 Environmental Issues</b>	Understand the impacts that digital technology has on the environment  Understand the term environment	Discuss the impacts of digital technology on the environment including: The impact of manufacture and disposal The impact of upgrading or replacing The impact of e-waste	
	<b>7 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	
	<b>8 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	

<b>9 Programming Lesson</b>	To develop python skills	Learn how to write structured programs	
<b>10 + 11 + 12 Legislation &amp; privacy issues</b>	<p>Understand the legislation: Data protection Act 2018 Computer Misuse Act 1990 Copyright Designs &amp; Patents Act 1988</p> <p>Understand the difference between open source and proprietary software</p>	<p>Discuss the impacts of digital technology on wider society including: Legal issues Privacy issues</p> <p>Describe legislation relevant to Computer Science: The Data Protection Act 2018 Computer Misuse Act 1990 Copyright Designs and Patents Act 1988</p> <p>Describe the different types of software licenses including open source and proprietary</p>	
<b>11</b>	How to answer an 8 mark question		
<b>12</b>	Revision lesson TBC		
<b>13</b>	<b>Unit Assessment</b>		
<b>14</b>	Re-teach TBC		
<b>15</b>	Last weeks of term to be planned when details of activities are announced. GCSE RS exam and mocks will have taken place this half term and along with contingency for any missed lessons from the past year.		
<b>16</b>			
<b>17</b>			
<b>18</b>			
<b>19</b>			
<b>20</b>			
<b>21</b>			

Year 11	Lesson Name	Substantive Knowledge	Disciplinary Knowledge	Tier 3 Vocabulary
<b>Networks Connections &amp; Protocols</b>				
<b>Half Term 1</b>	<b>The Internet and WANs</b>	Define a WAN, the internet, IP address, DNS, NIC, MAC addressing, packet switching	Describe what the internet is  Explain the need for IP addressing of resources on the Internet and explain how this can be facilitated by the role of DNS services  Explain the need for Network Interface Cards and the uses of MAC addressing  Explain packet switching	LAN, Local Area Network, WAN, Wide Area Network, bandwidth, latency, Wireless access points, routers, switches, NIC, Network Interface Controller/Card, Transmission media, DNS, Domain Name Server, Hosting, The Cloud, Web servers and clients, star network, mesh network, topology, IP address, web server, file server, wired network, wireless network, Ethernet, Wi-Fi, Bluetooth, encryption, IP addressing, MAC addressing, TCP/IP, Transmission Control Protocol/Internet Protocol, FTP, File Transfer Protocol, POP, Post Office Protocol, IMAP, Internet Message Access Protocol, SMTP, Simple Mail Transfer Protocol, layers, IPv4, IPv6, MAC address.
	<b>Programming Lesson</b>	To develop python skills	Learn how to write structured programs	
	<b>Local Area Network</b>	Describe the difference between a Local Area Network and a Wide Area Network  Describe star and mesh network topologies  Describe routers and switches needed to connect stand-alone computers into a Local Area Network  Understand that there are different protocols that are in place to send data across a wired and wireless network	Identify different types of networks and explain why they are either a LAN or WAN  Explain why routers and switches/hubs are required to connect a network together  Explain the use of Ethernet standards to transmit data over a wired network  Explain the concept of virtual networks	

		Understand the term virtual networks		
<b>Wireless Networking</b>		Understand the term wireless and how the two different connection types: Wi-Fi and Bluetooth  Understand the term encryption	Explain how Wi-Fi and Bluetooth work  Explain why Wireless Access Points (WAPs) are created  Explain the need for encryption in given scenarios	
<b>Programming Lesson</b>		To develop python skills	Learn how to write structured programs	
<b>Client-server and peer-to-peer networks</b>		Understand the terms client-server and peer-to-peer networks, Hosting, The Cloud, transmission media  Describe what network performance is	Explain the advantages and disadvantages of client-server and peer-to-peer networks  Explain the advantages and disadvantages of various transmission media  Explain the factors that affect network performance	

## Lesson 11 Unit Assessment

<b>Reteach</b>	TBC		
----------------	-----	--	--

## Network Security & System Software

<b>Network Threats</b>	Understand the different forms of attacks on networks  Understand the threats that are posed by the following attacks: Malware Phishing Social engineering Brute force attacks	Explain each attack  Explain the threat and damaged that can be caused by each attack and the potential consequences	Malware, virus, Trojan horse, worm, social engineering, phishing, brute-force attack, denial of service attack, data interception and theft, SQL injection, penetration testing, anti-malware software, anti-virus software, firewalls, user access levels, passwords, encryption, physical security, operating system,
------------------------	--	--	---

		Denial of service attacks Data interception and theft SQL injection		user interface, graphical user interface (GUI), command line interface (CLI), memory management, multitasking, peripheral management, drivers, user management, file management, utility software, encryption software, defragmentation, data compression
	<b>Programming Lesson</b>	To develop python skills	Learn how to write structured programs	Python Objective 00 & 01 – TIME (Try, Investigate, Make, Evaluate), Students work at own pace through the different workbooks with guidance from the teacher, who tracks each students progress via an excel sheet. Support is given on an individual basis.
	<b>Preventing Vulnerabilities</b>	Be able to identify the following preventions against network attacks: penetration testing anti-malware software firewalls user access levels passwords encryption physical security	Be able to explain how each prevention method can help protect against different forms of attacks and be able to use the correct prevention for the corresponding attack	
	<b>Programming Lesson</b>	To develop python skills	Learn how to write structured programs	Python Objective 00 & 01 – TIME (Try, Investigate, Make, Evaluate), Students work at own pace through the different workbooks with

				guidance from the teacher, who tracks each students progress via an excel sheet. Support is given on an individual basis.
<b>Half term 2</b>	<b>OS</b>	Understand what an OS is  Name different OS	Explain the need for the following functions of an operating system: User interface Memory management and multitasking Peripheral management and drivers User management File management	
	<b>Utility Software</b>	Understand the term Utility software  Name the different types of utility software: Encryption, Defragmentation, Compression	Explain the purpose of Encryption, Defragmentation, Compression and why they are required	
	<b>Programm ing Lesson</b>	To develop python skills	Learn how to write structured programs	Python Objective 00 & 01 – TIME (Try, Investigate, Make, Evaluate), Students work at own pace through the different workbooks with guidance from the teacher, who tracks each students progress via an excel sheet. Support is given on an individual basis.

<b>Revision Lesson</b>	TBC – Based on formative assessments in lessons, homework, quizizz and smart revise as to what the students require		
<b>9 Unit Assessment</b>			
<b>Reteach</b>	TBC		
<b>Programm ing Lesson</b>	To develop python skills	Learn how to write structured programs	Python Objective 00 & 01 – TIME (Try, Investigate, Make, Evaluate), Students work at own pace through the different workbooks with guidance from the teacher, who tracks each students progress via an excel sheet. Support is given on an individual basis.
<b>Impacts of Digital Technology</b>			
<b>Ethical and cultural issues</b>	Understand the terms: Ethical Cultural	Discuss the impacts of digital technology on the wider society with specific reference to Ethical and cultural issues	Ethical, cultural, environmental, legislation, manufacture, disposal, upgrade, replace, e-waste, privacy, legal, data protection, computer

<b>Environmental Issues</b>	<p>Understand the impacts that digital technology has on the environment</p> <p>Understand the term environment</p>	<p>Discuss the impacts of digital technology on the environment including:</p> <p>The impact of manufacture and disposal</p> <p>The impact of upgrading or replacing</p> <p>The impact of e-waste</p>	<p>misuse, copyright, copyright designs and patents act, open source, proprietary, software licence</p>
<b>Programming Lesson</b>	<p>To develop python skills</p>	<p>Learn how to write structured programs</p>	
<b>Legislation &amp; privacy issues</b>	<p>Understand the legislation: Data protection Act 2018 Computer Misuse Act 1990 Copyright Designs &amp; Patents Act 1988</p> <p>Understand the difference between open source and proprietary software</p>	<p>Discuss the impacts of digital technology on wider society including:</p> <p>Legal issues</p> <p>Privacy issues</p> <p>Describe legislation relevant to Computer Science: The Data Protection Act 2018 Computer Misuse Act 1990 Copyright Designs and Patents Act 1988</p> <p>Describe the different types of software licences including open source and proprietary</p>	

		How to answer an 8 mark question	
		Revision lesson TBC	
Half term 3	<b>1</b>	<b>Unit Assessment</b>	
		Reteach tbc	
	<b>Programm ing Lesson</b>	To develop python skills	Learn how to write structured programs
		Revision for Mocks	
		Re-teach from Mocks	
	<b>Programm ing Lesson</b>	To develop python skills	Learn how to write structured programs
	<b>Trace Tables</b>	Understand the purpose of trace tables	To successfully understand and complete a (numbers of ) trace tables
	<b>Data types</b>	Understand the purpose of data types	To successfully give the correct type of data to given scenarios
	<b>Test Data</b>	Understand the purpose of test data	To successfully give the correct type of test data and data types to given scenarios
	<b>Programm ing Lesson</b>	To develop python skills	Learn how to write structured programs
	<b>Spot the bug!</b>	To develop coding skills and error finding	To be able to successfully find different types of errors in programs  To identify the correct error type and fix the error
	<b>Refining algorithms</b>	To develop coding skills and exam technique	To be able to successfully be given an algorithm and refine it to create a more slimline version e.g. adding in iteration or repetition
Half terms 4 + 5 will be revision based on what is required. A new document will be written to cater for the needs of the students after the mocks.
